

Academic Mindsets Are Important for Virtually All Jobs

To be prepared for any job, students need the deeper learning competency develop academic mindsets, which include positive attitudes and beliefs that increase academic perseverance and productivity. A May 2017 study by the Center on Education Policy linked three workstyles cited in the U.S. Department of Labor’s O*NET database to this deeper learning competency: achievement/effort, initiative, and self-control. All three of these workstyles were important for 97% of the O*NET occupations studied by CEP.

Academic Mindsets Are Important in These Jobs (and Many Others)
